DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a method for the radiation grafting of a compound that can be grafted onto a fluoropolymer.

Group II, claim(s) 14-20 and 24-27, drawn to a structure.

Group III, claim(s) 28, 29, 32-34, 37, and 38, drawn to a fluoropolymer.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reason: Claim 1 is not a novel invention. The method for the radiation grafting of a compound that can be grafted onto a fluoropolymer is already known in the prior art, and therefore Groups I, II, and III lack a common technical feature.

3. Murphy (U.S. Patent No. 5409997) teaches a melt processed fluoropolymer composition having a thermally stable, non-volatile, non-fugitive coagulant. The process involves blending a fluoropolymer, and at least one additional monomer (graftable compound), a coagulant (stabilizer); melt processed into a shaped article, such as a film or sheet, and exposing said composition to irradiation (gamma or beta) with a dose of 1-15 Mrads.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
